**BUILDING DIVISION**

<b>Plan Review (valuation cost)</b>	<b>Fee Calculations</b>	<b>Permit (valuation cost)*</b>	<b>Fee Calculations</b>
Up to \$15,999	\$95.00 (minimum)	Up to \$7,999	\$95.00 (minimum)
\$16,000 to \$100,000	0.6% of Valuation	\$8,000 to \$100,000	1.2% of Valuation
\$100,001 & up	\$600+0.3% of Val. Over \$100,000	\$100,001 & up	\$1,200+0.7% of Val. Over \$100,000
Title-24 Plan Check Fee (Windows/HVAC/Reroof)	\$54.00	Water Heater (Change out like for like)	\$60
Revisions to Approved Plans	\$95 min. TBD by Building Official	Backflow Preventer	\$60
Expedited PV Solar ≤ 10kW	\$95	Expedited PV Solar ≤ 10kW	\$105 (plus Green & doc fee)
Manufactured Dwelling Foundation review	Based on valuation of foundation and installation.	Manufacture Dwelling	\$475 (\$95 per inspection for a total of 5 inspections)
Fire Sprinkler Review	\$300.00	Permit to Reestablish an Expired Permit	\$95 per inspection determined by Building Official
<b>Inspections</b>	<b>Fee</b>	<b>Document Fee</b>	<b>Fee</b>
Overtime Inspection	Billable overtime rate and transportation costs	11"x17" plans	\$10
Permit Extension	\$95 per inspection (TBD by the Building Official)	Larger than 11"x17"	\$25
Re-inspection Fee	\$95	Large Projects	TBD by Building Official
Inspection w/out benefit of a permit (Staff time)	\$95 per hr/per. inspection	<b><u>FIRE DISTRICT IMPACT FEE</u></b> New SFD Only & COM New / Additions Comm/Industry	
<b>Other</b>	<b>Fees</b>	<b>El Dorado County Fire District (Res. 8968- 7/24/21)</b>	
Appeal to Board of Building Appeals	\$300	Residential (SFD)	\$1.03 sf
Notice of Non-Compliance	\$250 (plus recording fees TBD by the EDC Recorder Clerk's Office)	Residential (MFD)	\$1.49 sf
Green Fee – SB 1473(effective Jan. 1, 2009)	\$1.00 per every \$25,000 in permit value or fraction thereof.	Residential (Manufactured Dwelling)	\$1.08 sf
SMIP (State of California Seismic Fee; effective July 1, 2014)	R Group—0.013% of val. C Group—0.028% of val. Min. \$0.50	Retail/Commercial	\$0.87 sf
<b>School District</b>	<b>Fee</b>	Office	\$1.19 sf
Determined by the Office of Education (530-295-2202)	Fees charged for sf ≥ 500 sf	Industrial	\$0.83 sf
Residential	\$4.08 sf	Agriculture	\$0.53 sf
Commercial	\$0.66 sf	Warehouse/Distribution	\$0.69 sf

\*Construction valuations tabulated per square foot of new or converted area determined by type of occupancy and construction. Refer to the attached ICC Building Valuation Data Schedule (updated in February and August).

## Building Valuation Data – FEBRUARY 2024

The International Code Council is pleased to provide the following Building Valuation Data (BVD) for its members. The BVD will be updated at six-month intervals, with the next update in August 2024. ICC strongly recommends that all jurisdictions and other interested parties actively evaluate and assess the impact of this BVD table before utilizing it in their current code enforcement related activities.

The BVD table provides the “average” construction costs per square foot, which can be used in determining permit fees for a jurisdiction. Permit fee schedules are addressed in Section 109.2 of the 2024 *International Building Code* (IBC) whereas Section 109.3 addresses building permit valuations. The permit fees can be established by using the BVD table and a Permit Fee Multiplier, which is based on the total construction value within the jurisdiction for the past year. The Square Foot Construction Cost table presents factors that reflect relative value of one construction classification/occupancy group to another so that more expensive construction is assessed greater permit fees than less expensive construction.

ICC has developed this data to aid jurisdictions in determining permit fees. It is important to note that while this BVD table does determine an estimated value of a building (i.e., Gross Area x Square Foot Construction Cost), this data is only intended to assist jurisdictions in determining their permit fees. This data table is not intended to be used as an estimating guide because the data only reflects average costs and is not representative of specific construction.

This degree of precision is sufficient for the intended purpose, which is to help establish permit fees so as to fund code compliance activities. This BVD table provides jurisdictions with a simplified way to determine the estimated value of a building that does not rely on the permit applicant to determine the cost of construction. Therefore, the bidding process for a particular job and other associated factors do not affect the value of a building for determining the permit fee. Whether a specific project is bid at a cost above or below the computed value of construction does not affect the permit fee because the cost of related code enforcement activities is not directly affected by the bid process and results.

### Building Valuation

The following building valuation data represents average valuations for most buildings. In conjunction with IBC Section 109.3, this data is offered as an aid for the building official to determine if the permit valuation is underestimated. Again it should be noted that, when using this data, these are “average” costs based on typical construction methods for each occupancy group and type of construction. The average costs

include foundation work, structural and nonstructural building components, electrical, plumbing, mechanical and interior finish material. The data is a national average and does not take into account any regional cost differences. As such, the use of Regional Cost Modifiers is subject to the authority having jurisdiction.

### Permit Fee Multiplier

Determine the Permit Fee Multiplier:

1. Based on historical records, determine the total annual construction value which has occurred within the jurisdiction for the past year.
2. Determine the percentage (%) of the building department budget expected to be provided by building permit revenue.
- 3.

$$\text{Permit Fee Multiplier} = \frac{\text{Bldg. Dept. Budget} \times (\%)}{\text{Total Annual Construction Value}}$$

### Example

The building department operates on a \$300,000 budget, and it expects to cover 75 percent of that from building permit fees. The total annual construction value which occurred within the jurisdiction in the previous year is \$30,000,000.

$$\text{Permit Fee Multiplier} = \frac{\$300,000 \times 75\%}{\$30,000,000} = 0.0075$$

### Permit Fee

The permit fee is determined using the building gross area, the Square Foot Construction Cost and the Permit Fee Multiplier.

$$\text{Permit Fee} = \text{Gross Area} \times \text{Square Foot Construction Cost} \times \text{Permit Fee Multiplier}$$

### Example

Type of Construction: IIB

Area: 1st story = 8,000 sq. ft.  
2nd story = 8,000 sq. ft.

Height: 2 stories

Permit Fee Multiplier = 0.0075

Use Group: B

1. Gross area:  
Business = 2 stories x 8,000 sq. ft. = 16,000 sq. ft.
2. Square Foot Construction Cost:  
B/IIB = \$257.82/sq. ft.
3. Permit Fee:  
Business = 16,000 sq. ft. x \$257.82/sq. ft x 0.0075 = \$30,938

## Important Points

- The BVD is not intended to apply to alterations or repairs to existing buildings. Because the scope of alterations or repairs to an existing building varies so greatly, the Square Foot Construction Costs table does not reflect accurate values for that purpose. However, the Square Foot Construction Costs table can be used to determine the cost of an addition that is basically a stand-alone building which happens to be attached to an existing building. In the case of such additions, the only alterations to the existing building would involve the attachment of the addition to the existing building and the openings between the addition and the existing building.
- For purposes of establishing the Permit Fee Multiplier, the estimated total annual construction value for a given time period (1 year) is the sum of each building's value (Gross Area x Square Foot Construction Cost) for that time period (e.g., 1 year).
- The Square Foot Construction Cost does not include the price of the land on which the building is built. The Square Foot Construction Cost takes into account everything from foundation work to the roof structure and coverings but does not include the price of the land. The cost of the land does not affect the cost of related code enforcement activities and is not included in the Square Foot Construction Cost.

### Square Foot Construction Costs <sup>a, b, c</sup>
